- **Early and late blight control**
- **Dual-modes of action**
- **Multi-site fungicide activity**
- **Low to no risk of resistance**
- **Easy mixing**

Uniquely Formulated To Protect Potatoes

New Elixir™ fungicide is a dry flowable, multi-site, protectant fungicide specifically designed for your potato crop. When applied at the beginning of your disease management program, Elixir controls both early and late blight.

Elixir can be applied up to ten times per growing season at high rate.

Elixir fungicide, an effective and economical option for potato protection with very low risk of building resistance.

Formulation

75% WDG

FRAC Group

M3 & M5 fungicide

Crop

Potatoes

Diseases Controlled

Early blight (*Alternaria solani*)
Late blight (*Phytophthora infestans*)

Use Rates

0.90 kg/acre (2.24 kg/ha)

Pack Size

20 kg bag (one bag treats 22 acres)

Application Timing

Apply by ground or air.
Begin applications when plants are 10 to 15 cm.
As vines increase in size, apply at intervals of 7 to 10 days.

PHI

1 day

Spray Program

Use Elixir fungicide early in the season. Finish your spray program with an alternate fungicide, such as Manzate Pro-Stick or Penncozeb Raincoat. Up to 10 applications of Elixir are allowed at high rate.

ELIXIR FUNGICIDE PERFORMANCE DATA – POTATOES
