

## NEWS RELEASE

### UPI BEGINS SHIPMENTS OF GOLIATH XP TURF FUNGICIDE.

**KING OF PRUSSIA, PA, USA** – May, 2016 – UPI announces the availability of its newest product for the U.S. turf market – Goliath XP fungicide. Goliath XP is based on multiple chemistries – azoxystrobin and propiconazole.

“Goliath XP features two chemistries in one convenient product,” says Mike Bandy, UPI product manager. “It is particularly effective on brown patch and dollar spot, and is labeled for use on a total of 24 turf diseases.” The two chemistries in Goliath XP are designed to utilize multiple modes of action, resulting in resistance management as well as product effectiveness. Goliath XP is a liquid formula, packaged in convenient one gallon containers. It can be used on golf courses, residential turf and many other turf areas, with no limitations due to turf species.

Goliath XP is now registered in most U.S. states and is currently available for sale from UPI distributors.

#### About UPI

UPI (United Phosphorus, Inc.) is the North American subsidiary of UPL Limited, a leading global crop protection and seed producing company servicing customers in over 123 countries.
