LOCATION: N. Cal – B. Hanson U.C. Davis

NOTES:

Your Reliable Weed Control Solution.™

- Consistent, reliable supply
- Quality SL formulation
- Excellent efficacy
- Signal Word = CAUTION

Lifeline™ herbicide is a new non-selective, post-emergent herbicide providing broad spectrum weed control of some of the most challenging weeds; including control of *glyphosate* resistant marestail, hairy fleabane, malva, and filaree. Utilizing a unique mode of action, Lifeline inhibits glutamine production in the weeds which leads to a breakdown in photosynthesis. This makes Lifeline an excellent choice when developing your overall weed resistance management strategy.

Our Commitment to US Growers: UPI recognizes the needs of our growers, and is committed to providing a consistent supply of Lifeline to the market. Our parent company, UPL, is the 2nd global supplier of *glufosinate*. We have invested heavily in a modern manufacturing facility (located in Ankleshwar, Gujarat, India) that utilizes leading edge technologies and production practices to provide our growers with a superior quality herbicide. Through our commitment to both product efficacy and ongoing supply, UPI has positioned Lifeline to truly be Your Reliable Weed Control Solution!

Resistance Group

Group 10

Pack Sizes

2 x 2.5 gallon - 30 gallon drums - 250 gallon totes
