- Formulation type: Wettable powder
- Signal word: CAUTION
- DOT: Not DOT regulated
- pH for optimal performance: 4.0 to 9.0

### IRAC Group

4A

### Pack Size

23 ounce/jug

### Use Rates

Pests	Ounces of Strafer Max	Specific Directions
Aphids Fleahopper	0.6 - 1.1 oz/A	Begin applications when treatment thresholds have been reached. For aphids, species may differ in susceptibility to this product. If unsure of species, use the higher rate.
Whitefly Plantbugs	1.7 - 2.3 oz/A	For whitefly: begin applications when whitefly adults appear prior to development of nymphs. Do not wait for heavy populations to establish. For plantbugs: use the higher rate. Two applications at 7 - 10 day intervals may be required.
Thrips	0.8 - 1.1 oz/A	Begin applications when treatment thresholds have been reached. The addition of an adjuvant enhances coverage and may improve control.

### For Use as an Ovicide on Cotton

Budworm Bollworm	0.6 - 1.1 oz/A	Begin applications when treatment thresholds have been reached.
Whitefly	1.7 - 2.3 oz/A	Applications made for ovicidal control will not provide sustained control of mitigating adults.

Thorough coverage is important to obtain optimum control.
