

MANAGE LEAF SPOT RESISTANCE.

FOUR PROVEN FUNGICIDES. ONE AMAZING SUGARBEET HARVEST.

SUPER TIN
FUNGICIDE

A versatile stand alone or tank mix partner, Super Tin® provides superior residual control of Cercospora Leaf Spot. Super Tin is recommended by University as an important tool in your sugarbeet disease management program.

MANZATE
PRO-STICK
FUNGICIDE

With more than a half-century of proven results and no documented resistance, Manzate® Pro-Stick can be applied multiple times during your growing season to strengthen your leaf spot control program.

TOPSIN
FUNGICIDE

A locally systemic fungicide partner, Topsin® can be tank mixed with Super-Tin, Manzate or your strobilurin or triazole fungicides. Proven chemistry for reliable, residual control of leaf spot.

CUPROFIX ULTRA
40 DISPERSS
DRY FLOWABLE
FUNGICIDE/BACTERICIDE

Formulated with our advanced Disperss® technology, Cuprofix® Ultra is a fixed copper specifically designed for easy mixing and consistent coverage. With no PHI, you can apply Cuprofix Ultra right up to harvest time.
